

Phlebotomy at BCCC

YOU BELONG HERE

A photograph of a person's arm, likely a patient, with a blue tourniquet tied around the upper arm and a white bandage wrapped around the forearm. A clear test tube with a purple cap is visible on a white surface in the lower left. The background is a plain, light-colored wall.

What is a Phlebotomist?

Phlebotomists are healthcare professionals trained to take venipuncture/blood specimens for testing or donation.

- **Program requirements are discussed in detail on the first day of class.**

Program Requirements

- Hybrid course with online instruction. Student will need to be able to access Blackboard and attend in person for class, lab and clinical instruction.
- Student is responsible for: books, background check, immunizations, drug testing, and transportation to clinical site(s).
- Course requires 95 hours of clinical experience at a clinical facility. Clinical facilities require a background check, drug testing, and current immunizations.
- Student is responsible for purchasing CastleBranch. CastleBranch is a 3rd party vendor used for background check, drug testing and immunization documentation (\$90). Convictions or unsubstantiated drug tests are reviewed and determined by the clinical facility. Clinical facility decision is final.
- Student is responsible for purchasing Rotation Manager. Rotation Manager ensures student compliance with clinical facility. (\$29)
- Student is responsible for ensuring immunizations are up-to-date. Cost will vary depending on immunizations needed.
- Uniform: Price will vary depending on your place of purchase.
